Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, Physical Security Division

DATE: 8 OCT 1959

FROM : Chief, Technical Branch

SUBJECT: Counter Audio Inspection Prior
to Occupancy, Item 56*Safe 538
Chair #3*

1. On 16, 17 September 1959, a member of this Branch made a general survey of the new building site for the purpose of evaluating the audio penetration threat and how it might best be dealt with.

2. The two means of linkage from the building to any area outside for audio penetration purposes are by solid conductor or by radiation which were both studied for feasibility at important construction stages.

3. Attached is a breakdown of feasibility of penetrations at various construction stages and what must be done prior or during the stage.
